Narrative & Impression

ACCESSION#(s): A000244944, A000244938, A000244931

DATE: 4:24 PM

EXAM: REVIEW OF SUBMITTED BREAST IMAGING:

BILATERAL MAMMOGRAM WITH TOMOSYNTHESIS

Technique: bilateral mammogram: tomosynthesis images were obtained.

LEFT MAMMOGRAM WITH TOMOSYNTHESIS

Technique: left mammogram: tomosynthesis images were obtained.

LEFT LIMITED BREAST ULTRASOUND

Technique: left breast us: limited breast ultrasound was performed.

CLINICAL HISTORY: Left breast invasive ductal carcinoma, MSK path review confirmed.

COMPARISON(S):

FINDINGS:

MAMMOGRAM:

BREAST DENSITY: Heterogeneously dense, which may obscure small masses.

RIGHT BREAST:

No

LEFT BREAST:

* 1.3 cm irregular focal asymmetry in the central outer breast middle third depth (MLO 15/51 CC 15/55) on routine and subsequent ML and spot views (ML 21/56) with sonographic correlate below.

* Stable biopsy marker

ULTRASOUND:

Evaluation is limited as interpretation is based on static images.

LEFT BREAST:

3:00 breast 6 cm from the nipple, irregular hypoechoic mass measuring 1 x 0.6 x 1.3 cm.

On ultrasound-guided core biopsy was performed with needle traversing the mass and a heart marker placed. Postprocedure mammogram demonstrates biopsy marker in adequate position. Pathology revealed invasive ductal carcinoma.

LEFT AXILLA:

Not imaged.

ADDITIONAL IMAGING RECOMMENDED: None.

IMPRESSION:

1. Left breast invasive ductal carcinoma with heart marker in adequate position.
2. No

Electronically Signed By: WINNIE WAI-YIN AU MD on 5:04 PM
