Narrative

BILATERAL DIGITAL SCREENING MAMMOGRAMS WITH TOMOSYNTHESIS WITH CAD

Procedure Date/Time: 2:10 PM

History: This is a 70-year-old asymptomatic woman.

Comparison:

Technique: Tomosynthesis and 2-dimensional images are obtained and reviewed.

Findings:

Density: The breasts are heterogeneously dense, which may obscure small masses.

Right breast: No is a questioned area of architectural distortion at about the 9:00 axis at the junction of the anterior to middle one thirds of the breast tissue. There is also questioned architectural distortion at the lateral breast tissue along the posterior fat parenchymal junction without correlate on the MLO series. There is no separately today.

Left breast: No architectural distortion.

Exam End: 15:27

Specimen Collected: 16:52

Last Resulted: 16:55

Received From: Baptist Health Medical Center - Arkansas Result Received: 12:28
