

Surgical Pathology Submitted Slides Order: S25-088852

Order:

Collected 00:00 Status: Final result Dx: Encounter for consultation

Test Result Released: Yes (not seen)

Component

Clinical Information

Material received from outside hospital: MONTEFIORE NYACK HOSPITAL

Final Diagnosis

1,2. Outside Material; Breast, left medial with and without calcifications; stereotactic core biopsy (ST25-010494/ A;1;S1 to A;1;S3, A;1;S4-L1 to A;1;S4-L4, B;1;S1 to B;1;S3, B;1;S4-L1 to B;1;S4-L4, B;2;S1 to B;2;S3, B;2;S4-L1 to B;2;S4-L4; 21 H&E); Collected:

Breast parenchyma

Adenosis

Calcifications

Present, rare and minute

3,4. Outside Material; Breast, left lateral with and without calcifications; stereotactic core biopsy (ST25-010494/ C;1;S1 to C;1;S5, C;1;S7-L1 to C;1;S7-L3, D;1;S1 to D;1;S3; 9 H&E and 2 IHC); Collected:

Breast parenchyma

Atypical ductal hyperplasia (ADH), focally at the level of low grade ductal carcinoma in situ (DCIS)

Breast parenchyma

Adenosis

Columnar cell change

Calcifications

In atypical and non-atypical benign epithelium

I ATTEST THAT THE ABOVE DIAGNOSIS IS BASED UPON MY PERSONAL EXAMINATION OF THE SLIDES (AND/OR OTHER MATERIAL), AND THAT I HAVE REVIEWED AND APPROVED THE REPORT.

Disclaimer

Note: Specimen(s) received and accessioned at Memorial Hospital for Cancer and Allied Diseases Dept of Pathology, 300 E 66th St Room 425, New York, NY (PFI 8458). Any immunohistochemistry procedures on the case were performed at Memorial Hospital for Cancer and Allied Diseases - Dept of Pathology and Laboratory Medicine, 1275 York Ave, New York, NY (PFI 2514).

Slides may have been examined as digital images including consultation for intraoperative frozen sections. Hardware and software for digital images have been developed by Leica Biosystems, Philips, and MSK. Their performance characteristics have been determined by the MSK Department of Pathology and Laboratory Medicine (PFI 2514). It has not been cleared or approved by the U.S. Food and Drug Administration (FDA). This test has been granted approval by New York State as a laboratory developed test. This test is used for clinical purposes. Pursuant to the requirements of CLIA '88, our laboratory has established the equivalence and non-inferiority of this test for reporting of pathology.

Using Base Names in SmartLinks

Every Lab component (for example, WBC) has a corresponding base name SmartLink to pull the component into your note. Above is the base name

To pull a lab component with a base name .RESUFAST[TSH]

To pull two different lab components, type both their base names separated by a comma: .RESUFAST[TSH,WBC]

If you're interested in seeing more than just the last result, type a colon after the base name results to show: .RESUFAST[TSH:3] .RESUFAST[TSH,WBC:3]

If you're interested in seeing all lab results from a given time period (for example, one month or six weeks), type a left-facing bracket after the .GETLABS SmartLink, followed by a number week: .GETLABS[1M] .GETLABS[6W]

The common name project team and isn't used in standard SmartLinks.
