Patient: [REDACTED]
Exam Date: 9/23/2025 12:37 PM

Acc #: 10118795

Secondary ID: [REDACTED]

Exam Name: [REDACTED]

Indication: Patient [REDACTED] screening. The patient has no [REDACTED]
of breast cancer. The patient [REDACTED]

Date of last clinical exam: Longer than one year ago

Breast Cancer Risk:

NCI 5 year:0.8%

NCI Lifetime:2.7%

Comparison: Multiple prior mammograms dating back to [REDACTED]

Technique: 3D digital CC and MLO views of both breasts were obtained with reconstructed views. Deep
learning algorithms (AI) were applied to mammography and DBT images as a concurrent reading aid.

Findings:

The breast tissue is heterogeneously dense, which may obscure small masses. There is a 0.6 cm
spiculated mass at the 9:00 position of the left breast at a mid to posterior depth. Bilateral
scattered coarse benign-appearing calcifications are unchanged. No significant calcifications or
areas of architectural distortion are identified. Nonenlarged bilateral axillary lymph nodes are
seen.

Impression:

0.6 cm spiculated mass at the 9:00 position of the left breast. Further evaluation is required.

No [REDACTED]

BI-RADS CATEGORY: 0 - Incomplete - Need Additional Imaging Evaluation

Main Street Radiology

Name:

Date of Birth:

Recommendation: Left 3D diagnostic mammogram and targeted left breast ultrasound.

The patient

A letter will be sent to the patient

Approximately 10% of breast carcinomas are not radiographically detectable. A negative report should not delay biopsy if a clinically suspicious mass is present. Dense breasts may obscure an underlying neoplasm.

Patient a target due date for their next mammogram.

BIRADS 1: Negative

BIRADS 2: Benign

BIRADS 3: Probably Benign

BIRADS 4: Suspicious Abnormality - Biopsy should be considered.

BIRADS 5: Highly Suspicious of Malignancy

BIRADS 6: Known Malignancy

BIRADS 0: Incomplete - Need Additional Imaging Evaluation and/or Prior Mammograms for Comparison

The New York State Department of Health requires us to indicate the date of the patient's last clinical breast examination.
