BREAST BIOPSY REPORT

Patient:	YEH, WEN MEI I	Physician:	[REDACTED]	[REDACTED]	[REDACTED]
Age/Sex:	75/F		Main Street Radiology	Pathologist	[REDACTED]
DOB:	02/1 [REDACTED]	Physician	[REDACTED]	[REDACTED]	[REDACTED]
Phone:	(347) 661-6693	Address:	136-25 37th Ave	Date Collected:	[REDACTED]
	[REDACTED]		[REDACTED]	[REDACTED]	[REDACTED]
Specimen Type:	Breast			Date Reported:	[REDACTED]

Clinical Information

Clinical History: Right Breast 11:00 8cm FN - 0.6cm Irregular Hypoechoic Mass.
Rule Out Cancer.

ICD Code(s): C50.911

	Percentage Positive Cells	Staining Intensity	Interpretation
Estrogen Receptor (ER)	91-100%	Strong	Positive
Progesterone Receptor (PR)	91-100%	Strong	Positive

	Score (0-3+)	Interpretation
HER2 IHC	1+	Negative

	Percentage Positive Cells
Ki-67	5%

ERclone: ER clone (6F11) BOND Polymer Refine Detection. Negative and positive (internal if applicable) controls show appropriate results. This evaluation is performed according to guidelines issued by CAP/ASCO.

PRclone: PR clone (16) BOND Polymer Refine Detection. Negative and positive (internal if applicable) controls show appropriate results. This evaluation is performed according to guidelines issued by CAP/ASCO.

Her2clone: HER2 clone (CB11) BOND Polymer Refine Detection. Negative and positive (internal if applicable) controls show appropriate results. This evaluation is performed according to guidelines issued by CAP/ASCO.

Ki-67 clone (MM1) BOND Polymer Refine Detection. Negative and positive (internal if applicable) controls show appropriate results. This evaluation is performed according to guidelines issued by CAP/ASCO.

Diagnosis & Interpretation:

BREAST, RIGHT BREAST 11:00 8CM FN (ULTRASOUND-GUIDED BIOPSY):

- INVASIVE DUCTAL CARCINOMA
- NOTTINGHAM SCORE 5 OF 9 (ARCHITECTURE = 2 + NUCLEI = 2 + MITOSIS = 1).
- TUMOR INVOLVES 2 CORES AND MEASURES AT LEAST 5.5 MM

Gross Description:

BREAST, RIGHT BREAST 11:00 8CM FN (ULTRASOUND-GUIDED BIOPSY):

RECEIVED IN FORMALIN WITH PROPER PATIENT [REDACTED]
"11:00 8CM FN" ARE MULTIPLE CORES OF YELLOW-WHITE SOFT TISSUE RANGING "0.3 TO 2.2" CM IN LENGTH. THE ENTIRE SPECIMEN IS SUBMITTED IN CASSETTE(S) (A1).
ISCHEMIC TIME: (1) MIN; FIXATION TIME: (13) HRS;

GROSSED BY: GABRIELLE PRATT
