Name: WEN MEI I YEH
Phone: (347)661-6693
Gender: Female
DOB: [REDACTED]
Patient: [REDACTED]
Exam Date: [REDACTED] 12:59 PM

Acc #: 9765350
Secondary ID: [REDACTED]
Exam Name: [REDACTED]
Reason: Oth abn and inconclusive findings on dx imaging of breast | R928

Indication: Recall for lateral right breast asymmetry with distortion.

Comparison: [REDACTED] 2/2/2024, 1/27/2023, 8/28/2020, 7/23/2018, 6/1/17 .

3D tomosynthesis CC and MLO digital mammographic views of the right breast were obtained. The 2D reconstructed images were processed by the R2-CAD computer-aided detection system.

The breast tissue is heterogeneously dense, which may obscure small masses. There is a persistent asymmetry in the upper outer right breast since 2020 and probably since 2018 adjusting for technical differences. The long-term stability suggests a benign process. Six-month follow-up diagnostic mammography is recommended to confirm the impression of benignity.

Targeted right breast ultrasound of the outer right breast was performed.

10:00 2 cm from the nipple, there is mild focal duct ectasia. This probably does not correspond to the area of the mammographic finding.
Right axillary tail, 7 mm intramammary lymph node.

Impression:

Probably benign mammographic asymmetry. Six-month follow-up right breast mammography is recommended.

BI-RADS CATEGORY: 3 - Probably Benign

RECOMMENDED FOLLOW UP: Short interval follow up suggested.

Recommendation: Follow up diagnostic mammogram in 6 months

Date of Birth: [REDACTED]

A letter will be sent to the patient [REDACTED]

Approximately 10% of breast carcinomas are not radiographically detectable. A negative report should not delay biopsy if a clinically suspicious mass is present. Dense breasts may obscure an underlying neoplasm.

Patient [REDACTED] a target due date for their next mammogram.

BIRADS 1: Negative

BIRADS 2: Benign

BIRADS 3: Probably Benign

BIRADS 4: Suspicious Abnormality - Biopsy should be considered.

BIRADS 5: Highly Suspicious of Malignancy

BIRADS 6: Known Malignancy

BIRADS 0: Incomplete - Need Additional Imaging Evaluation and/or Prior Mammograms for Comparison

The New York State Department of Health requires us to indicate the date of the patient's last clinical breast examination.
